Bold designs, incandescent colours, enchanting images and exquisite craftsmanship are the common threads weaving across a collection of choice paintings jointly exhibited by four talented Chilean artists.

The images and effects of these paintings are surprisingly intertwined and harmonious. When put together, they act like a grand tapestry from the Andes. A look at this tapestry, you almost feel your waist wiggle uninhibitedly, with hands raised and waving, to the beat of South American music – to celebrate the love and joy of life.

Fully supported by the Chilean Consulate and Trade Commissioner, this exhibition invites viewers to the Andean villas, indigenous aroma, Latino personas brightly portrayed by confident and forceful brush strokes, passionate thick patches of oil paint and acrylic on canvas. The density, depth and diversity of the paintings is a sheer representation of this rich Chilean art.
